

NaturalTimber
SERIES

The **Tower Natural Timber Series** doors, with their adaptable flush mount or standard fit installation options, are suitable for a wide range of architectural styles.

This **Tower Natural timber Series** is ideal for homes that appreciate the beauty of natural timber combined with the flexibility of modern and traditional installation options, making it a perfect choice for various design preferences.

This design complements the following home styles:

Modern and Contemporary Homes – The clean lines and natural timber finish make these doors a perfect fit for modern homes, offering both a sleek, seamless look with the flush mount option or a more traditional appearance with the standard fit.

Minimalist Homes – The understated elegance of the timber design works well in minimalist homes, where simplicity and functionality are key, especially when installed as a flush mount for a more integrated look.

Scandinavian-Inspired Homes – Scandinavian architecture focuses on natural materials, clean lines, and functional design. The Timber-Flex Series brings warmth and simplicity to these spaces, whether flush or standard fit.

Eco-Friendly and Sustainable Homes – For homes designed with sustainability in mind, the natural timber aesthetic and the flexibility in installation make the Timber-Flex Series a great option, especially in homes that emphasize harmony with nature.

Mid-Century Modern Homes – The combination of natural wood and a simple, sleek design complements the mid-century modern aesthetic, offering a timeless look that blends well with mid-century architecture.

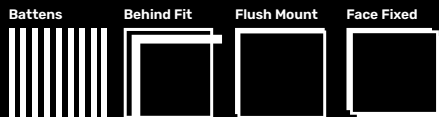

Transitional Homes – For homes that combine traditional and modern elements, the Timber-Flex Series provides versatility, offering the right balance between contemporary design and classic appeal.
